

## Embed a Google Form into Open LMS

In Google:

1. Create Google Form
2. Click "Send" in top right corner
3. Click <>
4. Highlight and copy all the content in the Embed HTML section

In Open LMS

1. Create Learning Activity
2. Resources tab
3. Choose Page
4. Create the name and any settings on the right you need
5. Under Page content click the drop down arrow then the <> for html

6. Delete the contents of the box then paste in what you copied in the Google Form
7. Save and return to course

TO NOTE:

- Students will have to click on "Read More" to expand the form.
- Doesn't seem to work in Firefox, only Chrome. Might want to include the direct link to the form under the Description section.
